What is a Collaborative Circle of Care?

A system providing a model to integrate, complement and enhance an existing system that is framed by the culture and governance protocols and procedures of the people.

The Collaborative Circle of Care's primary principle rests on its strengths based foundation informed by an inventory of the natural assets and resources of the individual within the context of their extended family, community and culture.

Collaborative Circles of Care Model

❖ **Vision Statement**

To provide a collaborative consortium of social, emotional, educational and vocational services that promotes holistic, integrated and culturally congruent access to children and families

❖ **Mission Statement**

To provide these social and educational services from a multi-disciplinary, multi-agency and family context that facilitates functional use of the service menu and integrates access to and implementation of individually designed strategies for resilience and development

❖ **Values Statement**

That prevention and intervention are reciprocal and that children and families can benefit from strategies that build upon their identified strengths and facilitate easy geographic, cultural and conceptual access to services that are integrated via an inter-agency site based model
